Emergency Care: Building nursing and midwifery expertise

This webinar will promote the benefits of emergency care training for nurses and midwives and will highlight the WHO Basic Emergency Care Course (BEC) as a means to gain skills in emergency care. It will show how the Emergency and Critical Care Network Group can support the delivery of the BEC worldwide. It will explore ways to deliver the BEC in countries to strengthen nursing and midwifery skills in emergency care using the WHO Emergency Care Tool Kit. Please join us.
